

SUPREME COURT OF THE UNITED STATES

Gunn v. Minton

568 U.S. 251 (2013) · No. No. 11-1118 · Decided February 20, 2013

SUMMARY

The Supreme Court held that 28 U.S.C. § 1338(a) does not give federal courts exclusive jurisdiction over a state-law legal malpractice claim arising from an underlying patent case. Although resolving the malpractice claim required deciding a disputed patent-law issue, that issue was not substantial to the federal system as a whole and transferring such claims to federal court would improperly disrupt the federal-state balance. The Court reversed and remanded the judgment of the Supreme Court of Texas.

CASE DETAILS

COURT	Supreme Court of the United States
WRITING FOR THE COURT	Chief Justice Roberts
JURISDICTION	Federal
DECIDED	February 20, 2013
DOCKET	No. 11-1118
DISPOSITION	reversed_and_remanded
PROCEDURAL POSTURE	Minton brought a Texas state-law legal malpractice action against his former patent attorneys. The Texas trial court granted summary judgment for the attorneys, and the Texas Court of Appeals affirmed both the jurisdictional ruling and the merits ruling. The Supreme Court of Texas reversed, holding that the malpractice action arose under federal patent law and belonged in federal court. The United States Supreme Court granted certiorari.
STANDARD OF REVIEW	De novo review of the jurisdictional question concerning whether the state-law malpractice claim arose under federal patent law. The Court also applied the Grable framework for embedded federal issues.
PRECEDENTIAL VALUE	binding
PARTIES	Jerry W. Gunn, et al. v. Vernon F. Minton

TOPICS

- subject matter jurisdiction
- patent law
- professional negligence
- federalism
- civil procedure

PRACTICE AREAS

civil procedure

patent law

professional negligence

federal jurisdiction

QUESTIONS PRESENTED

1. Whether 28 U.S.C. § 1338(a) gives federal courts exclusive jurisdiction over a state-law legal malpractice claim whose resolution requires determining whether a patent-law argument would have succeeded in an earlier federal patent case.
2. Whether Minton's malpractice claim necessarily raised a substantial and actually disputed federal patent issue capable of resolution in federal court without disrupting the congressionally approved balance between federal and state judicial responsibilities.

HOLDINGS

1. Section 1338(a) does not deprive state courts of subject matter jurisdiction over a legal malpractice claim based on an underlying patent matter merely because resolving the claim requires consideration of a hypothetical patent issue.
2. The malpractice claim necessarily raised and actually disputed a federal patent question, but those two satisfied Grable requirements were insufficient to establish federal jurisdiction.

KEY QUOTATIONS

“The substantiality inquiry under Grable looks instead to the importance of the issue to the federal system as a whole.” (568 U.S. at 258)

“Section 1338(a) does not deprive the state courts of subject matter jurisdiction.” (568 U.S. at 263)

FACTUAL BACKGROUND

Minton leased his TEXCEN securities-trading system to a brokerage more than one year before applying for a patent based substantially on that system. After a federal district court invalidated the patent under the on-sale bar, Minton's attorneys unsuccessfully sought reconsideration based on an experimental-use exception that had not been timely raised. Minton then sued the attorneys for legal malpractice, claiming that their failure to raise the argument earlier caused the loss of his patent infringement case.

PROCEDURAL HISTORY

Minton's patent infringement action in federal district court resulted in summary judgment declaring his patent invalid under the on-sale bar. The Federal Circuit affirmed after the district court rejected Minton's belated experimental-use argument as waived. Minton then sued his attorneys for malpractice in Texas state court, alleging that their failure to timely raise the experimental-use argument caused the loss of his patent case. The United States Supreme Court held that the state court had subject matter jurisdiction because the malpractice claim did not arise under federal patent law within the meaning of 28 U.S.C. § 1338(a), reversed the Texas Supreme Court, and remanded.

DISPOSITION

OPINION

ROBERTS, J.

(Slip Opinion) OCTOBER TERM, 2012 1 Syllabus NOTE: Where it is feasible, a syllabus (headnote) will be released, as is being done in connection with this case, at the time the opinion is issued. The syllabus constitutes no part of the opinion of the Court but has been prepared by the Reporter of Decisions for the convenience of the reader. See United States v. Detroit Timber & Lumber Co., 200 U.S. 321, 337.

SUPREME COURT OF THE UNITED STATES Syllabus GUNN ET AL. v. MINTON CERTIORARI TO THE SUPREME COURT OF TEXAS No. 11–1118. Argued January 16, 2013 —Decided February 20, 2013 Petitioner attorneys represented respondent Minton in a federal patent infringement suit.

The District Court declared Minton’s patent invalid under the “on sale” bar since he had leased his interactive securities trading system to a securities brokerage “more than one year prior to the date of the [patent] application.” 35 U.S. C. §102(b).

In a motion for reconsideration, Minton argued for the first time that the lease was part of ongoing testing, and therefore fell within the “experimental use” exception to the on-sale bar. The District Court denied the motion and the Federal Circuit affirmed, concluding that the District Court had appropriately held that argument waived. Convinced that his attorneys’ failure to timely raise the argument cost him the lawsuit and led to the invalidation of his patent, Minton brought a legal malpractice action in Texas state court.

His former attorneys argued that Minton’s infringement claims would have failed even if the experimental-use argument had been timely raised, and the trial court agreed. On appeal, Minton claimed that the federal district courts had exclusive jurisdiction over claims like his under 28 U.S. C. §1338(a), which provides for exclusive federal jurisdiction over any case “arising under any Act of Congress relating to patents.” Minton argued that the state trial court had therefore lacked jurisdiction, and he should be able to start over with his malpractice suit in federal court.

Applying the test of *Grable & Sons Metal Products, Inc. v. Darue Engineering & Mfg.*, 545 U.S. 308, the Texas Court of Appeals rejected Minton’s argument, proceeded to the merits, and determined that Minton had failed to establish experimental use.

The Texas Supreme Court reversed, concluding that the case properly belonged in federal court because the success of Minton’s malpractice claim relied upon a question of federal patent law. Held: Section §1338(a) does not deprive the state courts of subject matter jurisdiction over Minton’s malpractice claim. Pp. 4–13. (a) Congress has authorized the federal district courts to exercise original jurisdiction over “any civil action arising under any Act of Congress relating to patents,” and further decreed that “[n]o State court shall have jurisdiction over any [such] claim.” §1338(a).

Because federal law did not create the cause of action asserted by Minton’s legal malpractice claim, the claim can “arise under” federal patent law only if it “necessarily raise[s] a stated federal issue, actually disputed and substantial, which a federal forum may entertain without disturbing any congressionally approved balance of federal and state judicial responsibilities.” *Grable*, 545 U. S., at 314.

Pp. 4–6. (b) Applying Grable’s inquiry here, it is clear that Minton’s legal malpractice claim does not arise under federal patent law. Pp. 6–12. (1) Resolution of a federal patent question is “necessary” to Min- ton’s case.

To prevail on his claim, Minton must show that an exper- imental-use argument would have prevailed if only petitioners had timely made it in the earlier patent litigation. That hypothetical pa- tent case within the malpractice case must be resolved to decide Min- ton’s malpractice claim. P. 7.

(2) The federal issue is also “actually disputed.” Minton argues that the experimental-use exception applied, which would have saved his patent from the on-sale bar; petitioners argue that it did not. Pp. 7–8. (3) Minton’s argument founders, however, on Grable’s substanti- ality requirement.

The substantiality inquiry looks to the importance of the issue to the federal system as a whole. Here, the federal issue does not carry the necessary significance. No matter how the state courts resolve the hypothetical “case within a case,” the real-world result of the prior federal patent litigation will not change. Nor will allowing state courts to resolve these cases undermine “the develop- ment of a uniform body of [patent] law.” *Bonito Boats, Inc. v. Thun- der Craft Boats, Inc.*, 489 U.S. 141, 162.

The federal courts have ex- clusive jurisdiction over actual patent cases, and in resolving the nonhypothetical patent questions those cases present they are of course not bound by state precedents. Minton suggests that state courts’ answers to hypothetical patent questions can sometimes have real-world effect on other patents through issue preclusion, but even assuming that is true, such “fact-bound and situation-specific” effects are not sufficient to establish arising under jurisdiction, *Empire HealthChoice Assurance, Inc. v. McVeigh*, 547 U.S. 677, 701.

Finally, the federal courts’ greater familiarity with patent law is not enough, by itself, to trigger the federal courts’ exclusive patent jurisdiction. Pp. 8–12. (4) It follows from the foregoing that Minton does not meet Gra- Cite as: 568 U. S. ____ (2013) 3 Syllabus ble’s fourth requirement, which is concerned with the appropriate federal-state balance. There is no reason to suppose that Congress meant to bar from state courts state legal malpractice claims simply because they require resolution of a hypothetical patent issue.

P. 12. 355 S.W.3d 634, reversed and remanded. ROBERTS, C. J., delivered the opinion for a unanimous Court. Cite as: 568 U. S. ____ (2013) 1 Opinion of the Court NOTICE: This opinion is subject to formal revision before publication in the preliminary print of the United States Reports. Readers are requested to notify the Reporter of Decisions, Supreme Court of the United States, Wash- ington, D. C. 20543, of any typographical or other formal errors, in order that corrections may be made before the preliminary print goes to press.

WRIT OF CERTIORARI TO THE SUPREME COURT OF TEXAS [February 20, 2013] CHIEF JUSTICE ROBERTS delivered the opinion of the Court. Federal courts have exclusive jurisdiction over cases “arising under any Act of Congress relating to patents.” 28 U.S. C. §1338(a).

The question presented is whether a state law claim alleging legal malpractice in the handling of a patent case must be brought in federal court. I In the early 1990s, respondent Vernon Minton devel- oped a computer program and telecommunications net- work designed to facilitate securities trading.

In March 1995, he leased the system—known as the Texas Comput- er Exchange Network, or TEXCEN—to R. M. Stark & Co., a securities brokerage. A little over a year later, he ap- plied for a patent for an interactive securities trading system that was based substantially on TEXCEN.

The U. S. Patent and Trademark Office issued the patent in January 2000. Patent in hand, Minton filed a patent infringement suit in Federal District Court against the National Association of Securities Dealers, Inc. (NASD) and the NASDAQ Stock Market, Inc. He was represented by Jerry Gunn and the 2 GUNN v. MINTON Opinion of the Court other petitioners. NASD and NASDAQ moved for sum- mary judgment on the ground that Minton’s patent was invalid under the “on sale” bar, 35 U.S. C. §102(b).

That provision specifies that an inventor is not entitled to a patent if “the invention was... on sale in [the United States], more than one year prior to the date of the appli- cation,” and Minton had leased TEXCEN to Stark more than one year prior to filing his patent application. Reject- ing Minton’s argument that there were differences be- tween TEXCEN and the patented system that precluded application of the on-sale bar, the District Court granted the summary judgment motion and declared Minton’s patent invalid.

Minton v. National Assn. of Securities Dealers, Inc., 226 F. Supp. 2d 845, 873, 883–884 (ED Tex. 2002). Minton then filed a motion for reconsideration in the District Court, arguing for the first time that the lease agreement with Stark was part of ongoing testing of TEXCEN and therefore fell within the “experimental use” exception to the on-sale bar. See generally Pfaff v. Wells Electronics, Inc., 525 U.S. 55, 64 (1998) (describing the exception).

The District Court denied the motion. Minton v. National Assn. of Securities Dealers, Inc., No. 9:00–cv– 00019 (ED Tex., July 15, 2002). Minton appealed to the U. S. Court of Appeals for the Federal Circuit. That court affirmed, concluding that the District Court had appropriately held Minton’s experi- mental-use argument waived. See Minton v. National Assn. of Securities Dealers, Inc., 336 F.3d 1373, 1379– 1380 (CA Fed.

2003). Minton, convinced that his attorneys' failure to raise the experimental-use argument earlier had cost him the law- suit and led to invalidation of his patent, brought this malpractice action in Texas state court. His former law- yers defended on the ground that the lease to Stark was not, in fact, for an experimental use, and that therefore Cite as: 568 U. S. ____ (2013) 3 Opinion of the Court Minton's patent infringement claims would have failed even if the experimental-use argument had been timely raised.

The trial court agreed, holding that Minton had put forward "less than a scintilla of proof " that the lease had been for an experimental purpose. App. 213. It accordingly granted summary judgment to Gunn and the other lawyer defendants.

On appeal, Minton raised a new argument: Because his legal malpractice claim was based on an alleged error in a patent case, it "aris[es] under" federal patent law for purposes of 28 U.S. C. §1338(a). And because, under §1338(a), "[n]o State court shall have jurisdiction over any claim for relief arising under any Act of Congress relating to patents," the Texas court—where Minton had originally brought his malpractice claim—lacked subject matter jurisdiction to decide the case.

Accordingly, Minton argued, the trial court's order should be vacated and the case dismissed, leaving Minton free to start over in the Federal District Court. A divided panel of the Court of Appeals of Texas rejected Minton's argument. Applying the test we articulated in *Grable & Sons Metal Products, Inc. v. Darue Engineering & Mfg.*, 545 U.S. 308, 314 (2005), it held that the federal interests implicated by Minton's state law claim were not sufficiently substantial to trigger §1338 "arising under" jurisdiction.

It also held that finding exclusive federal jurisdiction over state legal malpractice actions would, contrary to *Grable's* commands, disturb the balance of federal and state judicial responsibilities. Proceeding to the merits of Minton's malpractice claim, the Court of Appeals affirmed the trial court's determination that Minton had failed to establish experimental use and that arguments on that ground therefore would not have saved his infringement suit.

The Supreme Court of Texas reversed, relying heavily on a pair of cases from the U. S. Court of Appeals for the 4th Circuit: *GUNN v. MINTON*, Opinion of the Court Federal Circuit, 355 S.W.3d 634, 641–642 (2011) (discussing *Air Measurement Technologies, Inc. v. Akin Gump Strauss Hauer & Feld, L. L. P.*, 504 F.3d 1262 (2007); *Immunocept, LLC v. Fulbright & Jaworski, LLP*, 504 F.3d 1281 (2007)).

The Court concluded that Minton's claim involved "a substantial federal issue" within the meaning of *Grable* "because the success of Minton's malpractice claim is reliant upon the viability of the experimental use exception as a defense to the on-sale bar." 355 S.W. 3d, at 644. Adjudication of Minton's claim in federal court was consistent with the appropriate balance between federal and state judicial responsibilities, it held, because "the federal government and

patent litigants have an interest in the uniform application of patent law by courts well-versed in that subject matter.” *Id.*, at 646 (citing *Immunoccept*, *supra*, at 1285–1286; *Air Measurement Technologies*, *supra*, at 1272).

Justice Guzman, joined by Justices Medina and Willett, dissented. The dissenting justices would have held that the federal issue was neither substantial nor disputed, and that maintaining the proper balance of responsibility between state and federal courts precluded relegating state legal malpractice claims to federal court.

We granted certiorari. 568 U. S. ____ (2012). II “Federal courts are courts of limited jurisdiction,” possessing “only that power authorized by Constitution and statute.” *Kokkonen v. Guardian Life Ins. Co. of America*, 511 U.S. 375, 377 (1994). There is no dispute that the Constitution permits Congress to extend federal court jurisdiction to a case such as this one, see *Osborn v. Bank of United States*, 9 Wheat.

738, 823–824 (1824); the question is whether Congress has done so, see *Powell v. McCormack*, 395 U.S. 486, 515–516 (1969). As relevant here, Congress has authorized the federal Cite as: 568 U. S. ____ (2013) 5 Opinion of the Court district courts to exercise original jurisdiction in “all civil actions arising under the Constitution, laws, or treaties of the United States,” 28 U.S. C. §1331, and, more particularly, over “any civil action arising under any Act of Congress relating to patents,” §1338(a).

Adhering to the demands of “[l]inguistic consistency,” we have interpreted the phrase “arising under” in both sections identically, applying our §1331 and §1338(a) precedents interchangeably. See *Christianson v. Colt Industries Operating Corp.*, 486 U.S. 800, 808–809 (1988).

For cases falling within the patent-specific arising under jurisdiction of §1338(a), however, Congress has not only provided for federal jurisdiction but also eliminated state jurisdiction, decreeing that “[n]o State court shall have jurisdiction over any claim for relief arising under any Act of Congress relating to patents.” §1338(a) (2006 ed., Supp. V).

To determine whether jurisdiction was proper in the Texas courts, therefore, we must determine whether it would have been proper in a federal district court—whether, that is, the case “aris[es] under any Act of Congress relating to patents.” For statutory purposes, a case can “aris[e] under” federal law in two ways. Most directly, a case arises under federal law when federal law creates the cause of action asserted.

See *American Well Works Co. v. Layne & Bowler Co.*, 241 U.S. 257, 260 (1916) (“A suit arises under the law that creates the cause of action”). As a rule of inclusion, this “creation” test admits of only extremely rare exceptions, see, e.g., *Shoshone Mining Co. v. Rutter*, 177 U.S. 505 (1900), and accounts for the vast bulk of suits that arise under federal law, see *Franchise Tax Bd. of Cal. v. Construction Laborers Vacation Trust for Southern Cal.*, 463 U.S. 1, 9 (1983).

Minton’s original patent infringement suit against NASD and NASDAQ, for example, arose under federal law in this manner because it was authorized by 35 U.S.C. §§271, 281. 6 GUNN v. MINTON Opinion of the Court But even where a claim finds its origins in state rather than federal law—as Minton’s legal malpractice claim indisputably does—we have identified a “special and small category” of cases in which arising under jurisdiction still lies.

Empire HealthChoice Assurance, Inc. v. McVeigh, 547 U.S. 677, 699 (2006). In outlining the contours of this slim category, we do not paint on a blank canvas. Unfortunately, the canvas looks like one that Jackson Pollock got to first. See 13D C. Wright, A. Miller, E. Cooper, & R. Freer, Federal Practice and Procedure §3562, pp. 175–176 (3d ed. 2008) (reviewing general confusion on question).

In an effort to bring some order to this unruly doctrine several Terms ago, we condensed our prior cases into the following inquiry: Does the “state-law claim necessarily raise a stated federal issue, actually disputed and substantial, which a federal forum may entertain without disturbing any congressionally approved balance of federal and state judicial responsibilities”?

Grable, 545 U.S., at 314. That is, federal jurisdiction over a state law claim will lie if a federal issue is: (1) necessarily raised, (2) actually disputed, (3) substantial, and (4) capable of resolution in federal court without disrupting the federal-state balance approved by Congress. Where all four of these requirements are met, we held, jurisdiction is proper because there is a “serious federal interest in claiming the advantages thought to be inherent in a federal forum,” which can be vindicated without disrupting Congress’s intended division of labor between state and federal courts.

Id., at 313–314. III Applying Grable’s inquiry here, it is clear that Minton’s legal malpractice claim does not arise under federal patent law. Indeed, for the reasons we discuss, we are comfortable concluding that state legal malpractice claims based on underlying patent matters will rarely, if ever, arise under Cite as: 568 U.S. ____ (2013) 7 Opinion of the Court federal patent law for purposes of §1338(a).

Although such cases may necessarily raise disputed questions of patent law, those cases are by their nature unlikely to have the sort of significance for the federal system necessary to establish jurisdiction. A To begin, we acknowledge that resolution of a federal patent question is “necessary” to Minton’s case.

Under Texas law, a plaintiff alleging legal malpractice must establish four elements: (1) that the defendant attorney owed the plaintiff a duty; (2) that the attorney breached that duty; (3) that the breach was the proximate cause of the plaintiff’s injury; and (4) that damages occurred. See Alexander v. Turtur & Associates, Inc., 146 S.W.3d 113, 117 (Tex.

2004). In cases like this one, in which the attorney's alleged error came in failing to make a particular argument, the causation element requires a "case within a case" analysis of whether, had the argument been made, the outcome of the earlier litigation would have been different. 355 S.W. 3d, at 639; see 4 R. Mallen & J. Smith, *Legal Malpractice* §37:15, pp. 1509–1520 (2012).

To prevail on his legal malpractice claim, therefore, Minton must show that he would have prevailed in his federal patent infringement case if only petitioners had timely made an experimental-use argument on his behalf. 355 S.W. 3d, at 644. That will necessarily require application of patent law to the facts of Minton's case. B The federal issue is also "actually disputed" here— indeed, on the merits, it is the central point of dispute.

Minton argues that the experimental-use exception properly applied to his lease to Stark, saving his patent from the on-sale bar; petitioners argue that it did not. This is just the sort of " 'dispute... respecting the... 8 GUNN v. MINTON Opinion of the Court effect of [federal] law' " that Grable envisioned. 545 U. S., at 313 (quoting *Shulthis v. McDougal*, 225 U.S. 561, 569 (1912)).

C Minton's argument founders on Grable's next requirement, however, for the federal issue in this case is not substantial in the relevant sense. In reaching the opposite conclusion, the Supreme Court of Texas focused on the importance of the issue to the plaintiff's case and to the parties before it. 355 S.W. 3d, at 644 ("because the success of Minton's malpractice claim is reliant upon the viability of the experimental use exception as a defense to the on-sale bar, we hold that it is a substantial federal issue"); see also *Air Measurement Technologies*, 504 F. 3d, at 1272 ("the issue is substantial, for it is a necessary element of the malpractice case").

As our past cases show, however, it is not enough that the federal issue be significant to the particular parties in the immediate suit; that will always be true when the state claim "necessarily raise[s]" a disputed federal issue, as Grable separately requires.

The substantiality inquiry under Grable looks instead to the importance of the issue to the federal system as a whole. In Grable itself, for example, the Internal Revenue Service had seized property from the plaintiff and sold it to satisfy the plaintiff's federal tax delinquency. 545 U. S., at 310–311. Five years later, the plaintiff filed a state law quiet title action against the third party that had purchased the property, alleging that the IRS had failed to comply with certain federally imposed notice requirements, so that the seizure and sale were invalid.

Ibid. In holding that the case arose under federal law, we primarily focused not on the interests of the litigants themselves, but rather on the broader significance of the notice question for the Federal Government.

We emphasize as: 568 U. S. ____ (2013) 9 Opinion of the Court sized the Government's "strong interest" in being able to recover delinquent taxes through seizure and sale of property, which in

turn “require[d] clear terms of notice to allow buyers... to satisfy themselves that the Service has touched the bases necessary for good title.” *Id.*, at 315.

The Government’s “direct interest in the availability of a federal forum to vindicate its own administrative action” made the question “an important issue of federal law that sensibly belong[ed] in a federal court.” *Ibid.* A second illustration of the sort of substantiality we require comes from *Smith v. Kansas City Title & Trust Co.*, 255 U.S. 180 (1921), which Grable described as “[t]he classic example” of a state claim arising under federal law.

545 U. S., at 312. In *Smith*, the plaintiff argued that the defendant bank could not purchase certain bonds issued by the Federal Government because the Government had acted unconstitutionally in issuing them. 255 U. S., at 198.

We held that the case arose under federal law, because the “decision depends upon the determination” of “the constitutional validity of an act of Congress which is directly drawn in question.” *Id.*, at 201. Again, the relevant point was not the importance of the question to the parties alone but rather the importance more generally of a determination that the Government “securities were issued under an unconstitutional law, and hence of no validity.” *Ibid.*; see also *Merrell Dow Pharmaceuticals Inc. v. Thompson*, 478 U.S. 804, 814, n. 12 (1986).

Here, the federal issue carries no such significance. Because of the backward-looking nature of a legal malpractice claim, the question is posed in a merely hypothetical sense: If Minton’s lawyers had raised a timely experimental-use argument, would the result in the patent infringement proceeding have been different? No matter how the state courts resolve that hypothetical “case within a case,” it will not change the real-world result of the prior federal patent litigation.

Minton’s patent will remain 10 *GUNN v. MINTON* Opinion of the Court invalid. Nor will allowing state courts to resolve these cases undermine “the development of a uniform body of [patent] law.” *Bonito Boats, Inc. v. Thunder Craft Boats, Inc.*, 489 U.S. 141, 162 (1989). Congress ensured such uniformity by vesting exclusive jurisdiction over actual patent cases in the federal district courts and exclusive appellate jurisdiction in the Federal Circuit.

See 28 U.S. C. §§1338(a), 1295(a)(1). In resolving the nonhypothetical patent questions those cases present, the federal courts are of course not bound by state court case-within-a-case patent rulings. See *Tafflin v. Levitt*, 493 U.S. 455, 465 (1990).

In any event, the state court case-within-a-case inquiry asks what would have happened in the prior federal proceeding if a particular argument had been made. In answering that question, state courts can be expected to hew closely to the pertinent federal precedents. It is those precedents, after all, that would have applied had the argument been made. *Cf. ibid.* (“State courts adjudicating civil RICO claims will... be guided by federal court interpretations of the relevant federal criminal

statutes, just as federal courts sitting in diversity are guided by state court interpretations of state law”).

As for more novel questions of patent law that may arise for the first time in a state court “case within a case,” they will at some point be decided by a federal court in the context of an actual patent case, with review in the Federal Circuit. If the question arises frequently, it will soon be resolved within the federal system, laying to rest any contrary state court precedent; if it does not arise frequently, it is unlikely to implicate substantial federal interests.

The present case is “poles apart from *Grable*,” in which a state court’s resolution of the federal question “would be controlling in numerous other cases.” *Empire HealthChoice Assurance, Inc.*, 547 U. S., at 700. Minton also suggests that state courts’ answers to hypothetical patent questions can sometimes have real-world effect on other patents through issue preclusion.

Brief for Respondent 33–36. Minton, for example, has filed what is known as a “continuation patent” application related to his original patent. See 35 U.S. C. §120; 4A D. Chisum, *Patents* §13.03 (2005) (describing continuation applications). He argues that, in evaluating this separate application, the patent examiner could be bound by the Texas trial court’s interpretation of the scope of Minton’s original patent.

See Brief for Respondent 35–36. It is unclear whether this is true. The Patent and Trademark Office’s Manual of Patent Examining Procedure provides that *res judicata* is a proper ground for rejecting a patent “only when the earlier decision was a decision of the Board of Appeals” or certain federal reviewing courts, giving no indication that state court decisions would have preclusive effect.

See Dept. of Commerce, Patent and Trademark Office, *Manual of Patent Examining Procedure* §706.03(w), p. 700–79 (rev. 8th ed. 2012); 35 U.S. C. §§134(a), 141, 145; Reply Brief 9–10. In fact, Minton has not identified any case finding such preclusive effect based on a state court decision. But even assuming that a state court’s case-within-a-case adjudication may be preclusive under some circumstances, the result would be limited to the parties and patents that had been before the state court.

Such “fact-bound and situation-specific” effects are not sufficient to establish federal arising under jurisdiction. *Empire HealthChoice Assurance, Inc.*, *supra*, at 701. Nor can we accept the suggestion that the federal courts’ greater familiarity with patent law means that legal malpractice cases like this one belong in federal court. See *Air Measurement Technologies*, 504 F. 3d, at 1272 (“The litigants will also benefit from federal judges who have experience in claim construction and infringement matters”); 355 S.W.

3d, at 646 (“patent litigants have an interest in the uniform application of patent law by courts 12 GUNN v. MINTON Opinion of the Court well-versed in that subject matter”). It is true that a similar interest was among those we considered in *Grable*. 545 U. S., at 314. But the possibility that a state court will incorrectly resolve a state claim is not, by itself, enough to trigger the federal courts’ exclusive patent jurisdiction, even if the potential error finds its root in a misunderstanding of patent law.

There is no doubt that resolution of a patent issue in the context of a state legal malpractice action can be vitally important to the particular parties in that case. But something more, demonstrating that the question is significant to the federal system as a whole, is needed. That is missing here. D It follows from the foregoing that *Grable*’s fourth requirement is also not met.

That requirement is concerned with the appropriate “balance of federal and state judicial responsibilities.” *Ibid.* We have already explained the absence of a substantial federal issue within the meaning of *Grable*. The States, on the other hand, have “a special responsibility for maintaining standards among members of the licensed professions.” *Ohralik v. Ohio State Bar Assn.*, 436 U.S. 447, 460 (1978).

Their “interest... in regulating lawyers is especially great since lawyers are essential to the primary governmental function of administering justice, and have historically been officers of the courts.” *Goldfarb v. Virginia State Bar*, 421 U.S. 773, 792 (1975) (internal quotation marks omitted).

We have no reason to suppose that Congress—in establishing exclusive federal jurisdiction over patent cases—meant to bar from state courts state legal malpractice claims simply because they require resolution of a hypothetical patent issue. Cite as: 568 U. S. ____ (2013) 13 Opinion of the Court * * * As we recognized a century ago, “[t]he Federal courts have exclusive jurisdiction of all cases arising under the patent laws, but not of all questions in which a patent may be the subject-matter of the controversy.” *New Marshall Engine Co. v. Marshall Engine Co.*, 223 U.S. 473, 478 (1912).

In this case, although the state courts must answer a question of patent law to resolve Minton’s legal malpractice claim, their answer will have no broader effects. It will not stand as binding precedent for any future patent claim; it will not even affect the validity of Minton’s patent.

Accordingly, there is no “serious federal interest in claiming the advantages thought to be inherent in a federal forum,” *Grable*, *supra*, at 313. Section 1338(a) does not deprive the state courts of subject matter jurisdiction.

The judgment of the Supreme Court of Texas is reversed, and the case is remanded for further proceedings not inconsistent with this opinion. It is so ordered.
